AI technology platforms

Information System

Super Entrance

## Goal: 99% AI Penetration in Core Business by 2027

Deep Water Brain-Cloud

59

Number of Agents

13.5P

AI Computing Power

167M

Knowledge Base

>95%

Q&A Accuracy

80%

AI Penetration Rate

### Governance System

Rules First

Secure Access

Tiered Authorization

End-to-end Traceability

Ensuring Safe, Standardized, and Sustainable Application

### Product Output

Scenario-based Agents

All-in-one Device

Solutions

Delivering Standardized Solutions to the Industry

### AI-Powered Water Stewardship for Every Home

China’s First AI Agent for Water Utility Services

Water Consumption Analysis

Proactive Service

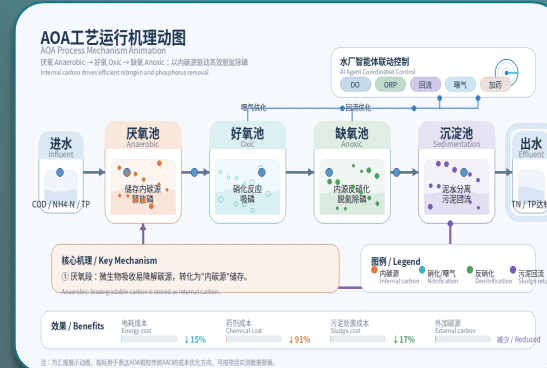

Work Order Generation

3.5 Million Smart Water Meters+DeepSeek

Annual Complaint Reduction Rate ≥15%

### Water Plant Operations Commander

Digital Employee for Water Plants and Stations

Data Analytics

Process Optimization

Intelligent Inspection

Average Efficiency Improvement **35%**

Energy Cost Reduction **15%**

### Water Distribution Network Leakage Agent

Digital Leakage Control Analyst

Pressure Balancing

Proactive Early Warning

Closed-Loop Management and Control

DMA-Based Metering, Leakage Control

Water Network Leakage Rate **4.4%**
