PROJECTS ACROSS PERU

DIVERSE PROJECTS

All projects are in Water & Sanitation

 **DESALINATION**
Seawater desalination plants
to secure water supply for
coastal cities.

 **POTABLE WATER SUPPLY**
Systems to capture, treat and
distribute safe drinking water
to communities.

 **WASTEWATER TREATMENT
(PTAR)**
Modern treatment plants to
improve environmental quality
and public health.

 **SANITATION SYSTEMS**
Collection and treatment
systems to expand sanitation
coverage and resilience.

 **COMBINATIONS OF MODALITIES**
Projects may include one or more
components and different delivery
modalities to meet local needs.

PIPELINE BY STAGE

UNLOCKING PPP DELIVERY

-  Strong pipeline with projects in advanced stages.
-  Early-stage preparation and technical studies support.
-  Coordination with authorities and sector regulators.
-  Improved risk allocation and bankability.
-  Market outreach and investor engagement.

From projects to impact: ProlInversión is committed to turning a strong pipeline into **sustainable water and sanitation services** for Peru.
